Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 36-55 are rejected under 35 U.S.C. 102(b) as being anticipated by Kelley.

The patent to Kelley discloses an apparatus for handling cards comprising a card loading area 2, 3, 4 for receiving a group of playing cards, a shuffling chamber having a plurality of card-receiving compartments 12 in the form of a card delivery trays, and a card moving system comprising two sequential single card moving components 17, 19 positioned for moving at least one card at a time from the card loading area into a card-receiving compartment. The two sequential card moving components comprise a first single card moving component 17 that moves at least a single card from the card loading area towards a second card moving component 19. The second card moving component receives individual cards from the first card moving component. A microprocessor 26 controls card movement. Sets of cards are delivered all at the same time to the tray 12 as a group of cards. A separator 21 is located between each adjacent card-receiving compartment, and there is an edge 22 of the separator that a card moved into card-receiving compartments contacts before the card is fully inserted into a card-receiving compartment. The card receiving compartments 12 are of the same size. After at least one of the individual hand is manually removed from the

delivery tray, another individual hand is automatically delivered from the apparatus to the delivery tray.

Double Patenting

3. Claims 36-55 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-31 of U.S. Patent No. 6,588,750. Although the conflicting claims are not identical, they are not patentably distinct from each other because independent claims 36, 44 and 51 of the present invention recite all the elements and steps recited in the independent claims 1, 21, 22, 23, 24 and 25 of U.S. Patent No. 6,588,750. However, claims 36, 44 and 51 of the present invention are broader than the independent claims 1, 21, 22, 23, 24 and 25 of U.S. Patent No. 6,588,750, because there is no recitation of "a mechanism that moves the card moving mechanism and the shuffling chamber relative to each other so that cards moved by the card moving mechanism are aligned for delivery into a card receiving compartment".

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
